SNo.	Questions	Answers
1.	Getting error when run the backend application java.sql.SQLException: Access denied for user 'root'@'localhost' (using password: YES) Error starting ApplicationContext. To display the conditions report re-run your application with 'debug' enabled.	Steps to resolve this error: 1) Create a database in MySQL using the command: create database upgradpg 2)Navigate to upstac-api-stub\src\main\resources\application.properties. 3)Change the value of username and password according to MySQL workbench.
2.	Error when starting yarn	Please follow the below steps and check. I assume you are using a windows system only. 1.Open windows powershell Before following step 2 , please make sure you are using file UPSTAC UI(Frontend) 2. Navigate to upstac ui folder, cd C:\Users\IdeaProjects\upstac-ui (unzip the upstac ui file and give that path in above command) 3. While you are in this folder run below commands given in Session2 in same order **npm install -g yarn** **yarn install** **yarn start** Wait for each operation to complete & then enter another command. Upstac UI opens up after the last command is successful. Prior to doing above items, make sure node js is installed in your system.
3.	Getting error in installing yarn via power shell error ;	This error happens due to a security policy that won't let scripts be executed on your system without you having approved of it. You can do so by opening up a PowerShell window with administrative

	PS C:\Users\LENOVO> yarn install
	
	yarn : File C:\Users\LENOVO\AppData\Roaming\npm\yarn.ps1 cannot be loaded because running scripts is disabled on this
	system. For more information, see about_Execution_Policies at https:/go.microsoft.com/fwlink/?LinkID=135170.
	At line:1 char:1
	+ yarn install

	   + CategoryInfo : SecurityError: (:) [], PSSecurityException
	   + FullyQualifiedErrorId : UnauthorizedAccess
		rights (search for PowerShell in the main menu and select Run as administrator from the context menu) and run command:
		
		set-executionpolicy remotesigned

4.	How do I connect to my sql	Create a database in MySQL using the command: create database upgradpg How to setup MY SQL , watch the videos mentioned in the below link: https://learn.upgrad.com/v/course/1128/session/131211/segment/717550

5.	Failed to compile.
	./src/items.scss
	(./node_modules/css-loader/dist/cjs.js??ref--6-oneOf-5-1!./node_modules/postcss-loader/src??postcss!./node_modules/resolve-url-loader??ref--6-oneOf-5-3!./node_modules/sass-loader/dist/cjs.js??ref--6-oneOf-5-4!./src/items.scss)
	Error: Cannot find module 'E:\upg\upstac-ui\node_modules\d\index.js'. Please verify that the package.json has a valid "main" entry
		Could you try the following
		    1. Delete the package-lock.json file in your UI folder
		    2. Run the command **yarn install**
		    3. Run the UI application **yarn start**
